European Journal of Operational Research 79 (1994) 551–553

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 79

1 One machine scheduling problem with fuzzy duedates
S. Han, H. Ishii and S. Fujii
13 Optimal recycling of waste materials in a plastic extrusion production process
S.P. Ladany and K.C. So
25 A Lagrangean decomposition solution to *a single line multiproduct scheduling problem*
R. de Matta
38 Group scheduling jobs on a single machine: A multi-objective approach with preemptive priority structure
S.P. Rana and N. Singh
51 Reliability of interconnected scheduled services
M. Carey
73 Operationalizing approximate multiattribute utility functions for use in practice
J.L. Corner
85 A simple algorithm to incorporate transactions costs in quadratic optimisation
C.J. Adcock and N. Meade
95 A polyhedral approach to the rural postman problem
A. Corberán and J.M. Sanchis
115 Decision making under partial probability information
C. Parkan
123 Optimal and heuristic inventory replenishment models for deteriorating items with exponential time-varying demand
M.A. Hariga and L. Benkherouf
138 A surrogate heuristic for set covering problems
L.A.N. Lorena and F. Belo Lopes
151 Call for Papers – Special Issue on New Approaches in Evaluating the Performance of Financial Institutions

Feature Issue on DSS Development

153 A comparative study in DSS development
K.M. van Hee and J.K. Lenstra
158 'PLATE': A decision support system for resource constrained scheduling problems
A.T.M. Aerts, A. Jansen, L. Klieb, C. Noorlander and G. Wolf
167 A network flow algorithm for just-in-time project scheduling
E.V. Levner and A.S. Nemirovsky
176 Development of a heuristic project scheduler under resource constraints
R. Minciardi, M. Paolucci and P.P. Puliafito
183 A decision support system for the resource constrained project scheduling problem
E. Nowicki and C. Smutnicki
196 MIPS: A DSS for multiobjective interactive project scheduling
T. Ryś, R. Stanek and W. Ziembla
208 A decomposition approach in a DSS for a resource constrained scheduling problem
P. Serafini and M.G. Speranza
220 DSS for multiobjective project scheduling
R. Słowiński, B. Soniewicki and J. Węglarz

0377-2217/94/$07.00 © 1994 Elsevier Science B.V. All rights reserved

230 On the usefulness of standard industrial classifications in comparative financial statement analysis
R. Dahlstedt, T. Salmi, M. Luoma and A. Laakkonen
239 Resource allocation for a stochastic CPM-type network through perturbation analysis
Y.-w. Wan
249 Group preference aggregation methods employed in AHP: An evaluation and an intrinsic process for deriving members' weightages
R. Ramanathan and L.S. Ganesh
266 A robust strategy approach to a strategic mobility problem
G. Ulusoy and R. Uzsoy
277 Valued preference structures
J.C. Fodor and M. Roubens
287 A local constraint based analysis approach to project scheduling under general resource constraints
L. Özdamar and G. Ulusoy
299 The Travelling Salesman Problem with pick-up and delivery
G. Mosheiov
311 Inspection error effects on economic selection of target value for a production process
S.-L. Chen and K.-J. Chung
325 On the coordination of product and by-product flows in two-level distribution networks: Model formulations and solution procedures
J.M. Bloemhof-Ruwaard, M. Salomon and L.N. Van Wassenhove
340 Combinatorial algorithms for some 1-facility median problems in the plane
H.W. Hamacher and S. Nickel
352 The k-neighbor, r-domination problems on interval graphs
D.S. Joshi, S. Radhakrishnan and N. Chandrasekharan
369 A quadratically convergent global algorithm for the linearly-constrained minimum cross-entropy problem
S.C. Fang and H.S.J. Tsao
379 Estimation of returns to scale using data envelopment analysis: A comment
R. Färe and S. Grosskopf

383 Flexible automation investments: A problem formulation and solution procedure
V. Lotfi and N.C. Suresh
405 Extended block replacement policy with used item and general random minimal repair cost
S.-H. Sheu
417 An analysis of shift class design problems
A.W.J. Kolen and L.G. Kroon
431 Design of a two-stage procedure for three-class screening
C.T. Kim, K. Tang and M. Peters
443 An interactive algorithm for solving multiple objective integer linear programming problems
S.C. Narula and V. Vassilev
451 The general multi-retailer EOQ problem with vehicle routing costs
S. Anily
474 Data-level parallel solution of min-cost network flow problems using ε-relaxations
X. Li and S.A. Zenios
489 Modelling a large, sparse spatial interaction matrix using data relating to a subset of possible flows
T.C. Bailey and A.G. Munford
501 Lagrangian relaxation based approaches to capacitated hub-and-spoke network design problem
T. Aykin
524 A TSSP + 1 decomposition strategy for the vehicle routing problem
C.E. Noon, J. Mittenthal and R. Pillai
537 Pseudoconvex optimization for a special problem of paint industry
T. Illés, J. Mayer and T. Terlaky
549 The job shop tardiness problem: A corrected model
S. Wilhelm
